

COLLEGE CODE : 9623

COLLEGE NAME : Amrita College Of Engineering And Technology

DEPARTMENT : Computer Science and Engineering

STUDENT NMD-ID :DAA059D1A9A72D8AD9041D5187F878C3

ROLL NO : 962323104075

DATE :12-09-2025

Completed the project named as phase_02_ReactJS routing with login protection

NAME :ReactJS routing with login protection

SUBMITTED BY,

NAME : praveen santhosh. S

MOBILE NO :9080367940

Phase 2 Title Slide

Phase 2: Technical Design & Architecture

- ◆ Tech stack, UI structure, Data flow, and Diagrams

TECH STACK SELECTION (PART1)

- Frontend
- React.js → component-based UI, fast rendering
- React Router → seamless navigation between pages
- Tailwind CSS (optional) → clean, modern styling

TECH STACK SELECTION(PART 2)

- State & Authentication
- React useState/useContext → manage login state
- localStorage → (future) persist login sessions
- Backend (Future Plan)
- Node.js + Express for APIs
- JWT (JSON Web Tokens) for secure authentication

UI STRUCTURE OVERVIEW

- Navigation Bar → links to Home, About, Dashboard, Login/Logout
- Home Page → public welcome page
- About Page → static information page
- Login Page → authentication entry point
- Dashboard Page → private area for logged-in users

UI STRUCTURE(HIERARCHY VIEW)

API SCHEMA DESIGN(FUTURE READY)

- POST /login → Validate credentials, return token
- POST /logout → End session
- GET /dashboard → Fetch user-specific data
- Error Handling → Unauthorized access returns 401

DATA HANDLING APPROACH(PART1)

- Authentication Flow
- On login → state changes to logged-in
- On logout → state resets, redirect to home
- Future: store auth token in localStorage for persistence

COMPONENT /MODULE DIAGRAM

- Modules
- App.js → central router + layout
- ProtectedRoute.js → guards private routes
- Pages/ → Home, About, Dashboard, Login
- AuthContext.js (future) → global auth state management

BASIC FLOW DIAGRAM(STEP BY STEP)

User Journey:

1. User opens app → lands on Home page
2. Navigates using Navbar
3. Tries accessing Dashboard →
If logged in → show Dashboard
If not → redirect to Login
4. Login success → redirect to Dashboard
5. Logout → back to public pages

FLOW DIAGRAM(VISUAL)

PHASE 2 CLOSING SLIDE

Key Outcomes:

- Tech stack finalized (React, Router, optional backend)
-
- Clear UI structure & future API schema
-
- Data handling strategy defined
-
- Component and flow diagrams ensure clarity
